

MANOJ KUMAR

SENIOR SOFTWARE ENGINEER

Chennai, India | 9940695956 | manojkumarbtechit@gmail.com

PROFILE

Highly motivated and results-driven IT professional with 11 years of experience delivering innovative technology solutions across software development and project management. Skilled in Java, Python, cloud infrastructure, and DevOps, with a proven ability to quickly identify and resolve complex issues. Adept at translating technical concepts for both technical and non-technical stakeholders, enabling seamless collaboration and project success. Versatile engineer who adapts to requirements rather than being limited by specific technologies, demonstrating the ability to quickly learn and excel in any technology stack. Passionate about continuous learning and leveraging emerging technologies to deliver impactful solutions. Eager to contribute expertise and leadership to an organization where I can make a significant impact and continue to grow.

SKILLS

Java | Spring Boot | Python | Flask | FastAPI | MongoDB | SQL | CICD | GitHub Actions | Harness | Scripting | React JS | Jenkins | OpenText Octane | OpenText Performance Centre | OpenText Quality Centre | Data Analytics | Machine Learning | Artificial Intelligence (AI) | Software Architecture | Microservices | Version Control (Git) | Code Review and Quality Assurance | CI/CD Pipelines | Containerization (Docker, Kubernetes, OpenShift) | Helm Chart | Hashi Corp Vault | Checkmarx | SonarQube | Problem solving | Agile Methodologies (Scrum, Kanban)

WORK EXPERIENCE

Senior Software Engineer, Wells Fargo

Jan 2018 to Present

Quality & Test Engineering (QTE)

Result Logger APIs:

- Designed and implemented a Java-based middleware solution ("Result Logger") to manage large-scale test result ingestion for the Value Edge Octane application.
- Built a secure mechanism to track AppID, Workspace/Shared Space, SecretID associations externally, ensuring compliance and reducing platform-level exposure.
- Developed a queuing and throttling system to handle unpredictable, high-volume test execution loads across thousands of applications and developers.
- Mitigated Octane's /testResults API rate limitation (20 tests/sec) by introducing a backlog and controlled distribution of requests, preventing queue saturation.
- Eliminated the need for client-side retry logic by centralizing backpressure handling, improving reliability and fairness across shared spaces.
- Enhanced scalability and resilience of test result processing pipelines, ensuring consistent performance under distributed and variable workloads.

QTE Chatbot:

- Designed and developed a custom chatbot application using Gensim (NLP/ML) and Flask (Python web framework), developed entirely from ground up.
- Trained the chatbot on Confluence knowledge base data, enabling contextual, tool-specific help for QTE stakeholders and customers.
- Built a modern, interactive Chat UI using ReactJS, delivering a seamless user experience with responsive design and real-time interaction.
- Implemented natural language processing pipelines for query understanding, similarity matching, and response generation, ensuring accurate and relevant answers.
- Delivered a scalable, lightweight solution that improved self-service capabilities, reduced support overhead, and enhanced accessibility of QTE tool knowledge.

Centre of Excellence (CoE)

Key Contributions:

- Designed and delivered Proof of Concepts (PoCs) across multiple domains including:
- Reporting & Visualization – Built dashboards and reports to provide actionable insights.
- Data Insights – Applied statistical and analytical techniques to uncover trends and patterns.
- ETL Development – Created and optimized pipelines for data extraction, transformation, and loading.
- Testing – Ensured data accuracy and reliability through systematic validation.
- Sentiment Analysis – Implemented NLP-based solutions to analyse customer and stakeholder feedback.

Client Engagements: Citi Private Bank, Deutsche Leasing, DB Systel, Ernst & Young (E&Y), Paraxel.

EDUCATION

Saveetha Engineering College - Chennai

Aug 2010 to Apr 2014

Bachelor of Technology (B. Tech) – Information Technology – CGPA 7.4
